As required by the federal Clean Air Act (CAA) Section 100k, the EPA must act on the Plan within one year of finding the Plan complete. EPA approval of the Plan places it in the State Implementation Plan (SIP) as required by the federal Clean Air Act (CAA) and the EPA's Clean Air Fine Particle Implementation Rule, Final Rule (72 FR 20586-20667).

In addition to meeting the requirements of the CAA and containing measures needed to attain the NAAQS as expeditiously as practicable, the SIP includes the latest technical information, including emissions inventory, monitoring data, and computer modeling results. The Plan is divided into several chapters, with supporting documents provided as appendices. The District developed the Plan with an extensive public process, including workshops and draft documents provided by the District in April, June, and October of 2012.
