Project Title: New Draft Rule 4695 (Brandy and Wine Aging)

Project Location: This rule applies to any brandy and wine aging facility located within the boundaries of the San Joaquin Valley Unified Air Pollution Control District.

Project Description: The San Joaquin Valley Air Pollution Control District (District) is proposing to adopt Draft Rule 4695 (Brandy and Wine Aging). The project would satisfy a commitment in the District's 2007 Ozone Plan to develop a control measure for volatile organic compound (VOC) emissions from brandy and wine aging operations. Actual controls have already been installed on most brandy aging operations as an alternative emission reduction measure to comply with the requirements of Rule 4694 (Wine Fermentation and Storage Tanks). Thus, this project is expected to impact only one existing brandy operation. This control measure could achieve additional emission reductions by requiring VOC controls on wine aging operations.

This is to advise that the San Joaquin Valley Unified Air Pollution Control District, acting as a Lead Agency approved the above described project and has made the following determinations regarding the above described project:

1. The project [will will not] have a significant effect on the environment.
2. An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
 A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures [were were not] made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan [was was not] adopted for this project.
5. A statement of Overriding Considerations [was was not] adopted for this project.
6. Findings [were were not] made pursuant to the provisions of CEQA.

This is to certify that the District's Findings, Final EIR, or Negative Declaration, and record of project approval, is available to the General Public at: San Joaquin Valley APCD, 1990 E. Gettysburg Street, Fresno, CA
