

**NOTICE OF FINAL ACTION
FOR THE ISSUANCE OF AUTHORITY
TO CONSTRUCT PERMITS**

NOTICE IS HEREBY GIVEN that the Air Pollution Control Officer has issued Authority to Construct permits to San Joaquin Facilities Management for increasing the capacity of Flare '18 and revising the component counts and method of calculating the VOCs for several tanks, at Light Oil Western stationary source in Kern County.

All comments received following the District's preliminary decision on this project were considered.

Comments received by the District during the public notice period resulted in a condition requiring the tank to be leak-free be placed on Authority to Construct S-2246-7-4. These changes were minor and did not trigger additional public notification requirements, nor did they have any impact upon the Best Available Control Technology determination or on the amount of offsets required for project approval.

The application review for Project #S-1121705 is available for public inspection at http://www.valleyair.org/notices/public_notices_idx.htm and the **SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, 34946 FLYOVER COURT, BAKERSFIELD, CA 93308.**
