

**NOTICE OF PRELIMINARY DECISION
FOR THE PROPOSED SIGNIFICANT MODIFICATION
OF FEDERALLY MANDATED OPERATING PERMIT**

NOTICE IS HEREBY GIVEN that the San Joaquin Valley Air Pollution Control District solicits public comment on the proposed significant modification of the Federally Mandated Operating Permit to Chevron USA, Inc. at Fresno Heavy Oil Source in Coalinga, California. The purpose of the project is the modification of a 86.4 MMBtu/hr cogeneration system with a gas-fired turbine to install a selective catalytic reduction (SCR) system, replace the heat recovery steam generator (HRSG) and duct burner, and to install a continuous emissions monitoring system (CEMS).

The District's analysis of the legal and factual basis for this proposed action, project #C-1150307, is available for public inspection at http://www.valleyair.org/notices/public_notices_idx.htm and at any District office. The emission increase associated with this project is 428 lb-CO/year. This will be the public's only opportunity to comment on the specific conditions of the modification. If requested, the District will hold a public hearing regarding issuance of this modification. For additional information, please contact the District at (559) 230-6000. Written comments on the proposed initial permit must be submitted by December 10, 2015 to **ARNAUD MARJOLLET, DIRECTOR OF PERMIT SERVICES, SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT, 1990 EAST GETTYSBURG AVENUE, FRESNO, CA 93726.**
