

**San Joaquin Valley
Unified Air Pollution Control District
Best Performance Standard (BPS) x.x.xx**

June 22, 2010

Class	Dryers
Category	Fruit and Vegetable Drying Operations with a Gaseous Fuel-Fired Tunnel Dryer
Best Performance Standard	Average annual specific fuel consumption not exceeding 1,877 Btu per pound of moisture evaporated from the fruit processed. Compliance with this standard shall be demonstrated by monitoring and recordkeeping of fuel consumption, quantity of fruit processed, and the initial and final moisture content of fruit processed.
Percentage Achieved GHG Emission Reduction Relative to Baseline Emissions	17.0%

District Project Number	C-1100390
Evaluating Engineer	Dennis Roberts, P.E.
Lead Engineer	Martin Keast
Initial Public Notice Date	June 24, 2010
Final Public Notice Date	July 15, 2010
Determination Effective Date
