

Enhanced Vapor Recovery Testing

Course #340.2

The California Air Resources Board presents a one day class with a complete overview of periodic vapor recovery system performance testing conducted at Gasoline Dispensing Facilities (GDF), including:

- Discussion of purpose for periodic performance testing
- Overview of testing requirements in CARB Phase I and II EVR Executive Orders
- Review of test procedures and equipment requirements
- Discussion of test procedure oversight and verification by air quality inspectors
- Discussion of biases, interferences, and common errors

Prerequisite: **Course #340, Gasoline Dispensing Facilities Phase I and II Seminar**
