Chevron has requested a short variance from the applicable requirements of District Rules 2010, 2070, 2201, 2520, and 4623, in addition to applicable conditions of the subject permits. The requested variance period would be for a non-consecutive 24-hour period to occur sometime between August 11, 2021 and November 9, 2021, inclusive. If granted, the variance would allow Chevron to continue to store VOC containing liquids in the subject tanks without an operating or functional VRS while they complete the proposed work.
