

INDIRECT SOURCE REVIEW PROGRAM

2024 ANNUAL REPORT

July 1, 2023 - June 30, 2024

San Joaquin Valley
AIR POLLUTION CONTROL DISTRICT

**SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT
GOVERNING BOARD 2024**

CHAIR: VITO CHIESA
Supervisor, Stanislaus County

VICE CHAIR: DEBORAH LEWIS
Councilmember, City of Los Banos

MEMBERS:

DAVID COUCH
Supervisor, Kern County

ROBERT RICKMAN
Supervisor, San Joaquin County

ROSA ESCUTIA-BRAATON
Councilmember, City of Modesto

ALEXANDER C. SHERRIFFS, M.D.
Appointed by Governor

BUDDY MENDES
Supervisor, Fresno County

AMY SHUKLIAN
Supervisor, Tulare County

TANIA PACHECO-WERNER, PHD
Appointed by Governor

RUSTY ROBINSON
Supervisor, Kings County

LLOYD PAREIRA
Supervisor, Merced County

GILBERTO REYNA
Councilmember, City of Wasco

ROBERT MACAULAY
Supervisor, Madera County

LIZ WYNN
Councilmember, City of Visalia

ALVARO PRECIADO
Mayor, City of Avenal

I. EXECUTIVE SUMMARY

This “2024 Annual Report on the District’s Indirect Source Review Program” covers the reporting period from July 1, 2023, through June 30, 2024.

The District’s [Indirect Source Review \(ISR\) rule](#), was originally adopted in 2005 to reduce the growth in both nitrogen oxides (NOx) and particulate matter smaller than ten microns in aerodynamic diameter (PM₁₀) emissions from mobile and area sources associated with construction and operation of new industrial, commercial, residential, transit and other non-residential development projects in the Valley. New development projects create air pollution during construction and operation by prompting more vehicle trips and other pollution-causing activities. To address the rule requirements and achieve emissions reductions at the project site and within local communities, developers incorporate clean air measures into their project designs to reduce emissions impacts at project locations. Some examples include: use of clean, newer model-year off-road construction equipment, zero emission and or near-zero emission heavy duty on-road trucks and van fleets, zero and or near-zero emission on-site equipment, installation of electric vehicle charging infrastructure, solar power, installation of bike paths and sidewalks, and high-efficiency buildings.

If on-site clean air measures implemented by a developer do not achieve the emission reductions mandated by the ISR rule, the developer must pay an off-site mitigation fee for balance of the emission reductions required for the project. One hundred percent of off-site mitigation fees are used by the District to fund emission reduction projects through its incentive grant programs. Additionally, developers pay an administrative fee equal to four percent (4%) of the required off-site fees. This administrative fee is to cover the District’s cost of administering the off-site emission reduction projects through the District’s grants and incentives programs.

In addition to reducing the development project’s impact on air quality through compliance with the District’s ISR rule, a developer can further reduce the project’s impact on air quality by entering into a “Voluntary Emission Reduction Agreement” (VERA) with the District to address the mitigation requirements under the California Environmental Quality Act (CEQA) or National Environmental Policy Act (NEPA). Under a VERA, the developer may fully mitigate project emission impacts by providing funds to the District, which are then used by the District to administer emission reduction projects. The District has entered into 52 VERAs since 2005.

This annual report includes revenues, expenditures, and emission reductions achieved for both ISR and VERA (ISR-VERA program). To date, in addition to avoiding approximately over 22,000 tons of NO_x and PM₁₀ emissions from new development through the incorporation of on-site mitigation and clean-air design measures into projects subject to the Indirect Source Review rule, the District has achieved more than 20,736 tons of reductions in NO_x and PM₁₀ emissions through the investment of over \$180 million dollars in ISR and VERA funds through its emission reduction grants and incentives programs.

During this reporting period, the District received 263 ISR Air Impact Assessment applications and no new VERAs were entered into.

The total amount of funds received for this reporting period under the ISR rule and VERA program were \$3,556,331 and \$1,439,550, respectively, for a total of \$4,995,881. The District achieved emission reductions via grants and incentives clean-air projects totaling 1,615 tons NO_x and 227 tons PM₁₀, for a combined total of 1,842 tons, at a cost effectiveness of \$9,857 per ton of emissions reduced.

II. INTRODUCTION

The San Joaquin Valley's challenges in meeting national ambient air quality standards are unmatched anywhere in the nation due to the region's unique geography, meteorology and topography. Since 1992, the District has adopted more than 670 rules to implement an aggressive on-going control strategy to reduce emissions in the Valley in order to reach attainment of the federal mandates, resulting in air quality benefits throughout the Valley. Through these ongoing efforts by the District, and significant efforts by CARB to reduce emissions from mobile sources, NO_x emissions across the Valley have been reduced by over 75%, while stationary source emissions, which are under the District's jurisdiction, have been reduced by over 93% since 1980.

Although significant progress has been made, the San Joaquin Valley's population is expected to grow. The Population Research Unit of the Department of Finance recent population growth projections, demonstrated a 13.9% increase in the Valley's population from 2020 to 2035 period. In contrast, the total population for the State of California is projected to increase by only 7.4% over the same time period.

Population growth results in increased area source emissions from activities such as consumer product use, fuel combustion for heating and cooking, and landscape maintenance. The total number of vehicle miles traveled (VMT) also increases with population growth, resulting in more emissions due to the combustion of vehicle fuels. The projected growth in these so called “indirect source” emissions erodes some of the progress generated by emission reductions achieved through the District’s stationary source air quality management program and state and federal mobile source controls.

Although the District cannot directly regulate mobile source tailpipe emissions, it does have longstanding statutory authority to regulate indirect sources of air pollution. Pursuant to this authority, the District made a federally enforceable commitment to regulate indirect sources when it adopted its PM₁₀ Attainment Plan in June 2003. Subsequently, the California State Legislature passed Senate Bill 709, Florez, in the fall of 2003, which Governor Gray Davis subsequently signed and codified into the Health and Safety Code in §40604. This additional legislation required the District to adopt, by regulation, a schedule of fees to be assessed on area wide or indirect sources of emissions that are regulated by the District.

The purpose of the District's Indirect Source Review rule is to require developers to incorporate clean air measures and reduce emissions of NO_x and PM₁₀ from new development projects. It is important to note, particulate matter emissions from mobile sources are overwhelmingly PM_{2.5}, a subset of PM₁₀. Therefore, the PM₁₀ emission reductions achieved under ISR result directly in PM_{2.5} emission reductions. In other words, PM₁₀ emissions increases are being offset by emissions reductions that are overwhelmingly PM_{2.5}, a positive impact on PM_{2.5} concentrations.

The Indirect Source Review rule applies to any applicant that seeks to gain final discretionary approval for a development project, or any portions thereof, which upon full build-out will include any one of the following:

- 50 residential units
- 2,000 square feet of commercial space
- 9,000 square feet of educational space
- 10,000 square feet of government space
- 20,000 square feet of medical or recreational space
- 25,000 square feet of light industrial space
- 39,000 square feet of general office space

- 100,000 square feet of heavy industrial space
- 9,000 square feet of space not identified above

Additionally, the Indirect Source Review rule applies to any applicant that seeks to gain approval from a public agency for a large development project, which upon full build out will include any of the following:

- 250 residential units
- 10,000 square feet of commercial space
- 45,000 square feet of educational space
- 50,000 square feet of governmental space
- 100,000 square feet of medical office or recreational space
- 125,000 square feet of light industrial space
- 195,000 square feet of general office space
- 500,000 square feet of heavy industrial space
- 45,000 of square feet of space not identified above

In addition to the above, a transit or transportation development project is subject to the Indirect Source Review rule if construction exhaust emissions equal or exceed two (2.0) tons of NO_x or two (2.0) tons of PM₁₀.

Since the original adoption of Rule 9510 in 2005, the District continues to coordinate and conduct outreach with public agencies and developers in the Valley, to assist and educate on the requirements of Rule 9510. To ensure individual projects are in compliance with Rule 9510, the District utilizes a variety of mechanisms and tools such as:

- Presentations and educational workshops for developers and public agencies
- Ongoing Rule 9510 Small Business Assistance for developers and public agencies
- Rule 9510 project information on District Dust Control Plan and Construction Notification Forms
- Inclusion of ISR applicability requirements within the District's CEQA commenting letters to public agencies for new development projects in the Valley to ensure awareness on a project-by-project basis
- Utilizing CEQAnet, which is a searchable online database maintained by the State Clearinghouse (SCH) within the Office of Land Use and Climate Innovation that contains key project information for CEQA documents submitted to the SCH for review
- Utilizing CoSTAR which is a comprehensive online real estate service that contains detailed property information which allows the District to conduct outreach and ensure compliance with Rule 9510 requirements

In addition to the above, Rule 9510 also requires reporting for clean air measures committed by the developer, such as clean construction and operational fleets to ensure Rule 9510 requirements are satisfied. Towards this end, the District is continuously looking for ways to enhance outreach efforts with the goal of further educating developers and public agencies regarding compliance with Rule 9510 requirements.

This report was prepared pursuant to provisions of Rule 9510 that require the District to prepare an annual report regarding expenditure of received funds and achieved emission reductions. The annual report includes the following:

- Total amount of off-site fees received;
- Total monies spent;
- Total monies remaining;
- Any refunds distributed;
- A list of all projects funded;
- Total emissions reductions realized; and
- The overall cost effectiveness factor for the projects funded.

III. IMPLEMENTATION

District Indirect Source Review Rule

During this reporting period, the District received 263 ISR applications. For historic context, the number of ISR applications received each year is presented in Figure 1 below.

Figure 1: Number of ISR Applications Received

Voluntary Emission Reduction Agreements

A Voluntary Emission Reduction Agreement is an air quality mitigation measure by which a developer can voluntarily enter into a contractual agreement with the District to mitigate a development project's impact on air quality, going beyond reductions achieved by compliance with the District's ISR rule. Under the agreement, the developer provides funds to the District to administer the implementation of the VERA. The District then identifies emissions reductions projects, funds those projects, and verifies that the specified emission reductions have been successfully achieved.

The types of emission reduction projects that have been funded in the past include electrification of stationary internal combustion engines (such as agricultural irrigation pumps), replacing old heavy-duty trucks with new, cleaner, more efficient heavy-duty trucks, and replacement of older farm tractors with cleaner tractors. Since 2005, the District has entered into 52 VERAs. It is the District's experience that implementation of a VERA is an effective mitigation measure under CEQA, to achieve emission reductions necessary to reduce air quality impacts to a less than significant level.

For development projects subject to the ISR rule, the developer must also comply with applicable ISR rule provisions. This report therefore includes revenues and emission reductions achieved through both the ISR and the VERA process.

Oil and Gas Emission Reduction Agreement

In 2015, Kern County adopted an EIR for amendments to the Kern County Zoning Ordinance to address oil and gas exploration and operation activities in the identified area within Kern County. Consistent with the final EIR, Kern County and the District adopted an oil and gas emission reduction agreement (OGERA) to mitigate emissions associated with future oil and gas exploration and production in the San Joaquin Valley. Under this process, Kern County collects a mitigation fee from oil and gas companies when issuing permits for the drilling of new oil or gas production wells, and transfers the funds to the District to mitigate air quality impacts through its grants and incentives programs.

A Petition for Writ of Mandate filed in the Kern County Superior Court challenged Kern County's 2015 Ordinance. The County subsequently amended the Ordinance and accompanying EIR in 2021, which was also challenged by Petitioners. On June 7, 2022, the court issued a ruling that the 2021 amended Ordinance was defective in several respects and ordered suspension of the Ordinance. Following the County's correction of the defects, in November 2022, the court lifted suspension of the Ordinance to allow oil and gas permitting to resume.

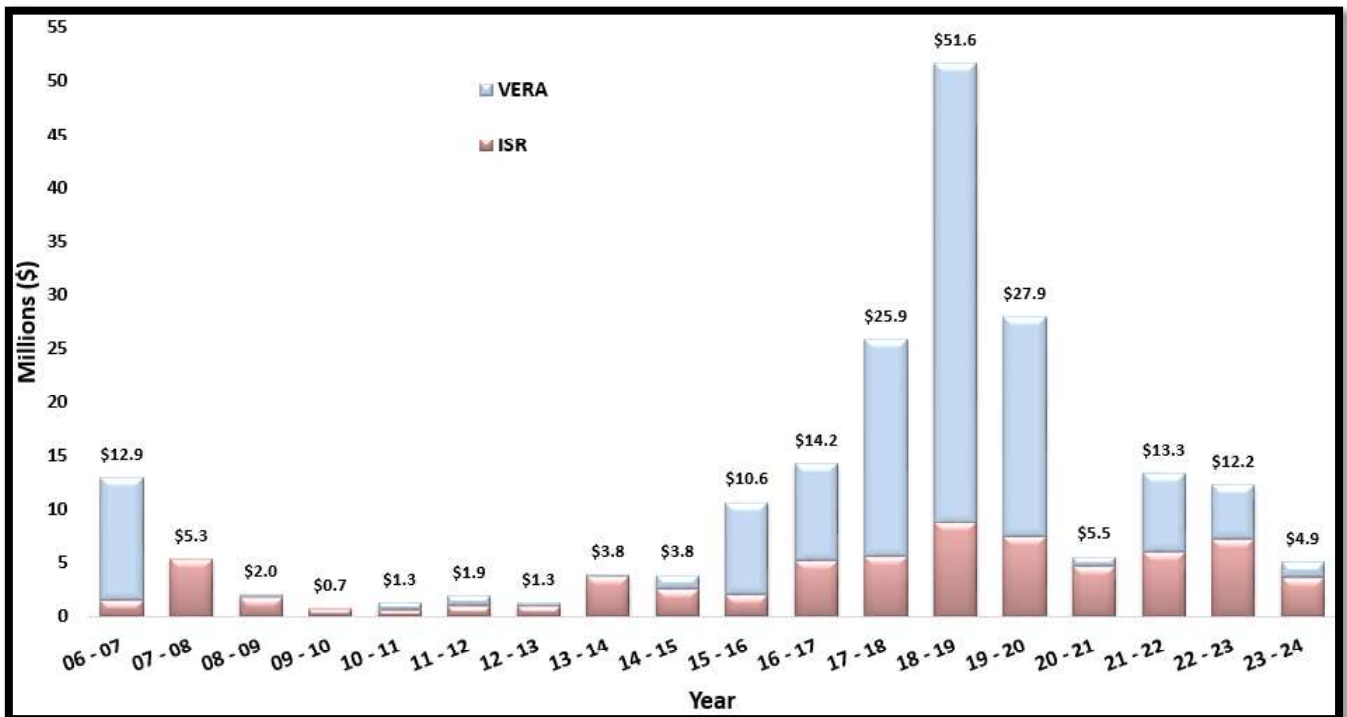

However, following an appeal of the Superior Court's ruling, on January 26, 2023, the Court of Appeal re-imposed the suspension of oil and gas permitting in Kern County pending review of the Superior Court's ruling. Subsequently, on March 7, 2024, the Appellate Court issued a second opinion directing the County to continue to suspend permitting under the ordinance and to correct violations under CEQA. As such, in March 2024, Kern County initiated the process to correct the CEQA violations in preparing and

public noticing a Notice of Preparation for a Draft Second Supplemental Recirculated Environmental Impact Report. The District is currently monitoring the Kern County process as it relates to implementation of the OGERA.

IV. FISCAL SUMMARY

The total amount of funds received for this reporting period under ISR and VERA were \$3,556,331 and \$1,439,550 respectively, for a total of \$4,995,881.

Figure 2: ISR and VERA Program Funds Received

As presented in Table 1 below, the District's ISR and VERA accounts held a beginning balance of \$27,619,699. During this reporting period, the District received \$4,995,881, spent (paid out) off-site emission reduction projects totaling \$16,141,958, encumbered \$8,861,117 in contracts for emission reduction projects, leaving an unencumbered balance of \$7,612,505.

Table 1: ISR-VERA Fiscal Summary (July 1, 2023 - June 30, 2024)

	ISR	VERA	Total
Beginning Fund Balance	\$5,630,551	\$21,989,148	\$27,619,699
Amount Received	\$3,556,331	\$1,439,550	\$4,995,881
Amount Refunded	\$0	\$0	\$0
Amount Spent (Paid Out)	-\$4,404,546	-\$11,737,412	-\$16,141,958
Ending Fund Balance	\$4,782,336	\$11,691,286	\$16,473,622
Encumbered Amount	-\$2,952,951	-\$5,908,166	-\$8,861,117
Ending Unencumbered Amount	\$1,829,385	\$5,783,120	\$7,612,505

V. EMISSION REDUCTION SUMMARY

Through the District's grants and incentives programs, clean-air emissions reduction projects undergo a thorough application review before the contract for these projects between the District and the project applicant is executed. Once executed, funds are then encumbered for that project. The contract is valid for a limited time to allow for the purchase of the new equipment and to submit a reimbursement request. Once the reimbursement request is approved, the funds encumbered for the emission reduction project are spent (reimbursed to the project applicant). This process typically takes several months for completion. Therefore, depending on the types of emission reduction projects available for funding, the funds received during this reporting period may result in the funds being spent the in same reporting period or in future reporting periods.

ISR and VERA Off-Site Emission Reductions Achieved

During this reporting period, the District achieved emission reductions via grants and incentives clean-air projects totaling 1,615 tons NO_x and 227 tons PM₁₀, for a combined total of 1,842 tons, at a cost effectiveness of \$9,857 per ton of emissions reduced, summarized in Table 2 below. The District spent ISR and VERA monies to fund 1,070 clean-air emission reduction projects.

These clean-air projects included the replacement of older, higher-emitting agricultural tractors with new latest-tier tractors, retrofit of residential open-hearth fireplaces with certified natural gas burning inserts, and rebates to Valley residents and businesses for the purchase or lease of new clean-air vehicles. A complete list of all clean-air projects funded under this annual report period is presented in Appendix A.

Table 2: Off-Site Emission Reductions Achieved (July 1, 2023 - June 30, 2024)

Program	NO _x (tons)	PM ₁₀ (tons)	Total (tons)	Amount Paid Out	Cost Effectiveness
ISR	288	101	389	\$6,129,546	\$15,758/ton
VERA	1,327	126	1,453	\$12,025,262	\$8,277/ton
Total	1,615	227	1,842	\$18,154,808	\$9,857/ton

ISR and VERA Off-Site Emission Reductions Achieved - Historic Since 2006

As discussed above, mitigation funds under ISR and VERA are administered through the District's grants and incentive programs to fund clean-air projects in the Valley. The District has built a reputation for excellence in the implementation of these programs, as highlighted in multiple audits by state agencies that commended the District's incentive programs for their efficiency and effectiveness. Since inception of the District's ISR rule and VERA program, the District's programs have achieved the emissions reductions shown in Table 3 below.

Table 3: Off-Site Emission Reductions Achieved Since 2006

Program	NOx (tons)	PM₁₀ (tons)	Total (tons)
ISR	5,900	1,753	7,653
VERA	11,930	1,153	13,083
Total	17,830	2,906	20,736

ISR Program Estimated Emission Reductions - Previous Reporting Period

Estimated emission reductions are a combination of emission reductions to be achieved through implementation of project design elements at full project build out and through funding off-site emission reductions projects through District grants and incentive programs using off-site emission reduction mitigation fees.

For this reporting period, projects assessed under ISR resulted in estimated combined on-site and off-site emission reductions as shown in Table 4 below.

Table 4: Estimated Emission Reductions from Approved ISR Projects During the Previous Reporting Period (July 1, 2023 - June 30, 2024)

Source	NOx (tons)	PM₁₀ (tons)	Total (tons)
On-site Emission Reductions	714	1,406	2,120
Off-site Emission Reductions	846	1,156	2,002
Total	1,560	2,562	4,122

VI. COST EFFECTIVENESS

Over the years, the District has had significant success achieving emission reductions under ISR, including reductions achieved through the aforementioned offsite mitigation fees. Since 2008, the offsite mitigation fees collected under the ISR is \$9,350 per ton of NOx and \$9,011 per ton of PM10.

Historically, voluntary incentive programs in the District and throughout the state follow the guidelines and cost-effectiveness methodologies established by the state's perennial Carl Moyer Memorial Air Quality Standards Attainment Program (Carl Moyer Program), which has served as the gold standard for SIP-creditable incentive programs in the nation. Over the past 25 years, CARB has worked alongside California's 35 local air districts to allocate more than \$1.5 billion in Moyer program grants to clean up over 69,000 engines, reducing NOx and VOC emissions by over 202,000 tons and toxic diesel PM by over 7,400 tons.

Cost effectiveness is defined as a measure of dollars provided to an emission reduction project for each ton of emissions reduced. Statute requires that CARB update the cost effectiveness annually based on changes to the California Consumer Price Index. In addition, SB 513 has required CARB and Air District's to establish new cost effectiveness limits that specifically reflect categories such as school bus replacement projects, as well as advanced zero-emission technology projects. These increased cost effectiveness limits reflect the significantly higher cost of new and emerging zero-emission technology, compared with the more traditional technology. With the promulgation and implementation of several statewide regulations that require a shift to zero-emission technology, the Carl Moyer Program, and other state incentive funding programs focus almost exclusively on funding zero-emission technology. The current program cost effectiveness limits must also take into account regulatory compliance dates that can limit the surplus nature of the emission reductions. These factors and the availability of voluntary incentive projects at any given time that meet these new mandates have led to an increase in the cost effectiveness year over year.

In October 2024, CARB approved changes to the Carl Moyer Program off-road engine and equipment load factors to more accurately represent "real-world" duty cycles and align with the state's emission inventory for off-road equipment. These changes will significantly raise cost effectiveness of equipment replacement projects. To address this, CARB increased the cost effectiveness limit in the Carl Moyer Program to \$60,000/ton for conventional diesel-to-diesel replacement projects and \$120,000/ton for diesel-to-zero emission replacement projects. The cost effectiveness will remain at \$522,000 for advanced, zero-emission projects, such as school buses and heavy-duty trucks.

Over the years, the District has had significant success in achieving emission reductions under ISR, funding a variety of off-site emission reduction projects utilizing our existing suite of voluntary incentive programs. This includes primary mobile source projects including light and heavy-duty equipment and vehicle replacement projects through the Drive Clean Rebate Program and the Tractor Replacement Program. Additionally, the District has funded off-site emission reduction projects through the Fireplace and Woodstove Change-out Program (formerly the Burn Cleaner Program), in which Valley residence are incentivized to replace older, high-polluting open hearth fireplaces and wood burning devices, with cleaner burning units and heat pumps. All of these programs are traditionally highly utilized and in many cases over-subscribed, with more demand than available funding. For example, in the Tractor Replacement Program, the District currently maintains a queue of available projects representing more than \$450 million in estimated incentives. In the Drive Clean Rebate Program, the District exhausted our annual allocation of funding in less than 4 months. The District anticipates this trend to continue and forecasts robust participation in all of the voluntary incentive programs in the future. While the demand for these programs is forecasted to remain high, the cost effectiveness of these projects has been increasing for the past several years (see Figure 3 below).

Figure 3: ISR Historical Cost Effectiveness (\$/ton)

Over the history of the ISR program, the District has successfully mitigated emissions associated with projects where the project proponents have provided off-site mitigation fees; however over the past five years specifically (2019 - 2023), the Rule's current collection rate in \$/ton is now below the actual \$/ton achieved through the District's Grants and Incentives programs. In addition, to cover the District's cost of administering these funds, the project proponent is required to pay an administrative fee equal to four percent (4%) of the required offsite mitigation fee. This administrative fee has been in place and remained at 4% since the rule's initial adoption in 2005, and is lower than all other grant programs that the District and other air districts administer, as other administrative fees range from 6.25% - 15%.

Several factors contribute to the rise in cost effectiveness that we have experienced and will likely continue to experience into the future. The cost effectiveness for projects funded under the Carl Moyer Program has recently been \$34,000/ton of emission reduced (combined NOx, ROG, and PM) for conventional projects and up to \$522,000 for advanced, zero-emission projects, such as school buses and heavy-duty trucks. However, in October 2024, CARB approved changes to the Carl Moyer Program off-road engine and equipment load factors to more accurately represent "real-world" duty cycles and align with the state's emission inventory for off-road equipment. These CARB-approved changes to cost effectiveness in the Carl Moyer Program have resulted in an approximately 35% increase and have prompted CARB to increase the cost effectiveness threshold in the Carl Moyer Program from \$34,000/ton of emissions reduced to \$60,000/ton for conventional diesel-to-diesel replacement projects and \$120,000/ton for diesel-to-zero emission replacement projects. The cost effectiveness remains at \$522,000 for advanced, zero-emission projects, such as school buses and

heavy-duty trucks. To illustrate this point, the District anticipates cost effectiveness for projects in the Tractor Replacement Program to increase from \$24,575/ton to more than \$33,000/ton.

To ensure that the dollars collected by the District in the future are sufficient to achieve and administer the required emission reductions under ISR, the District plans to re-evaluate these fees in 2025 through the process specified in Rule 9510.
