Newspaper notice for publication in Fresno Bee and for posting on valleyair.org

**NOTICE OF FINAL DECISION
FOR THE ISSUANCE OF AUTHORITY TO CONSTRUCT AND
SIGNIFICANT MODIFICATION OF FEDERALLY
MANDATED OPERATING PERMIT**

NOTICE IS HEREBY GIVEN that the Air Pollution Control Officer has issued the Authority to Construct permit to PPG Industries for the modification of permit unit C-948-11, to install a Selective Non-Catalytic Reduction (SNCR) system to reduce NOx emissions to comply with Rule 4354 requirements, at 3333 S Peach Ave, Fresno.

All comments received following the District's preliminary decision on this project were considered.

Comments received by the District during the public notice period resulted in revising the NH3 concentration calculation method for an oxy-fuel furnace. These changes were minor and did not trigger additional public notification requirements, nor did they have any impact upon the Best Available Control Technology determination or on the amount of offsets required for project approval.

The application review, project #1161600, is available for public inspection at http://www.valleyair.org/notices/public_notices_idx.htm, the SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, and at any other District office. For additional information, please contact the District at 559-230-6000.
